

Study 4 follow-up

Consent

ONLINE CONSENT FOR RESEARCH PARTICIPATION

We are planning to conduct a research study, which I invite you to take part in.

This form has important information about the reason for doing this study, what we will ask you to do if you decide to be in this study, and the way we would like to use information about you if you choose to be in the study.

Why are you doing this study?

You are being asked to participate in a research study about your thoughts on other people's behavior.

What will I do if I choose to be in this study?

You will be asked to rate how other people would behave in specific situations.

Study time:

Study participation will take no more than 3 minutes.

What are the possible risks or discomforts?

The risks to your participation in this study are mild physical or mental stress. The only benefit to you is the learning experience from participating in a research study. The benefit to society is the contribution to scientific knowledge.

What are the possible benefits for me or others?

You are not likely to have any direct benefit from being in this research study. The study results may be used to help other people in the future.

How will you protect the information you collect about me, and how will that information be shared?

Results of this study may be used in publications and presentations. Your study data will be handled as confidentially as possible. If results of this study are published or presented, no individual names or other personally identifiable information will be used.

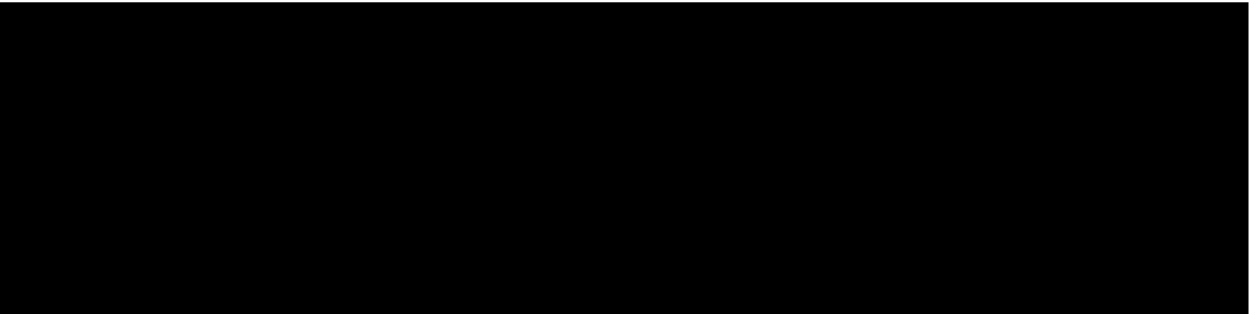

Financial Information

Participation in this study will involve no cost to you. You will be paid **\$0.20** for participating in this study.

What are my rights as a research participant?

Participation in this study is voluntary. If at any time and for any reason, you would prefer not to participate in this study, please feel free not to.

Who can I contact if I have questions or concerns about this research study?

Consent Section

By accepting this HIT you are consenting to participation in this study.

prediction

Some people engage in mental simulation. That means that these people imagine an action or an experience in detail, and take some time to vividly simulate the thoughts and feelings they would have.

We are interested in your thoughts on how people would feel and behave after having engaged in mental simulation.

Imagine a person who has just mentally simulated **feeling very hungry**. They spent about a minute imagining what they would feel like if they were very hungry and wrote down their thoughts.

Now, we would like to ask you some questions about how you think they would behave after having simulated for one minute.

Consider whether you think that simply imagining an experience could actually change someone's behavior and preferences. Also consider whether the simulation would be quickly forgotten, and would thus not have any meaningful effect on a person.

Imagine a person who has just mentally simulated **feeling very full**. They spent about a minute imagining what they would feel like if they were very full and wrote down their thoughts.

Now, we would like to ask you some questions about how you think they would behave after having simulated for one minute.

Consider whether you think that simply imagining an experience could actually change someone's behavior and preferences. Also consider whether the simulation would be quickly forgotten, and would thus not have any meaningful effect on a person.

now

Imagine the person is asked to report which products and activities they are currently in the mood for.

After the mental simulation, what do you think they would report preferring right now?

Right now, they would prefer...

Going on a
date to a
movie
